PROFESSIONAL SUMMARY

Computer Science graduate specialised in Data Science with hands-on experience building full-stack and AI-enabled applications. Proven ability to deliver end-to-end solutions from development to cloud deployment, solving real-world problems at scale.

SKILLS

- **Programming Languages:** Java, Python, JavaScript
- **Backend Development:** Node.js, Express.js, SQL, MongoDB
- **Frontend Development:** React.js, Next.js, HTML, CSS
- **Machine Learning & AI:** Supervised & Unsupervised Learning
- **Tools & Technologies:** AWS, Git, GitHub, Docker, OAuth, Socket.io, CI/CD, Claude
- **Core Concepts:** Data Structures, DBMS, OOPs, SDLC, Rest Architecture

WORK EXPERIENCE

April 2025 - August 2025

Full Stack Developer Intern Inspiring Wave Digitech

- Architected 12+ RESTful APIs handling 50K+ daily requests; optimized MongoDB queries reducing response time by 81% (800ms → 150ms).
- Implemented JWT + role-based access control, reducing unauthorized access by 98% across 4 user roles.
- Diagnosed and resolved production issues in Agile-based SDLC environment, maintaining stable deployments with minimal runtime errors
- Deployed applications on AWS (EC2, S3) with Docker containers, reducing deployment time by 40%.

PROJECTS

SnapFix - AI-Powered Civic Issue Reporting App | [Github](#) | [Demo](#) | [Live](#)

August 2025

- Engineered a full-stack application (Node.js, React, MongoDB) that automates civic maintenance issue reporting and lifecycle tracking for 50+ test users.
- Designed role-based workflows routing tasks in real-time task routing and updates using Socket.io.
- Integrated ML image classification module achieving 94% accuracy in categorizing civic issues automatically.
- Deployed containerized solution on cloud infrastructure with JWT authentication and RBAC

Customer Segmentation Analysis | [Github](#) | [Live](#)

March 2025

- Build K-Means clustering model segmenting 5000+ customers based on purchasing patterns and behavior.
- Developed interactive Streamlit dashboard for real-time cluster visualization and exploration.
- Implemented data preprocessing and feature engineering using elbow method and silhouette analysis.

AI-Powered Virtual Interviewer | [Github](#) | [Demo](#)

October 2025

- Engineered voice-based mock interview system integrating Google Cloud Speech-to-Text, Gemini LLM, and Text-to-Speech APIs with 95%+ transcription accuracy.
- Enabled 100+ mock interviews with contextual Q&A across 8+ technical domains.
- Built a CLI-based solution showcasing conversational AI, and speech processing.

EDUCATION

Swami Vivekananda Institute of Technology

Bachelor's Degree in Computer Science Engineering (Data Science)- **CGPA: 8.1**

October 2022 - May 2026

CERTIFICATIONS

Smart India Hackathon(SIH) 2023: Certificate awarded to finalists of the hackathon.

IBM AI Fundamentals certificate

Google Generative AI certificate
